

X-ray generator mount XRI50

The X-ray generator mount attaches to the PackBot toolbar with two ball retaining bolts holding the mount in axial position. The XRI50 generator attaches to the mount by a standard tripod screw.

X-ray generator mount XR200/XRS3

The X-ray generator mount attaches to the PackBot toolbar with two ball retaining bolts holding the mount in axial position. The XR200 and XRS-3 generators attach to the mount via the existing tripod mount fixture on the generator. The top end of the mount fits into the generator clip-fixture.

Foam-fingers

This simple and low cost tool proves to be an ideal assistant for gripping sensitive, slippery or shapeless objects
