

The truck/wall mount is designed to store the PackBot EOD on the side wall of the response truck. The steel construction does not have predrilled retaining holes. Please consult the vehicle supplier to determine an acceptable mounting location. The mount comes primed, but without the final paint coat.

The basic weight of the PackBot EOD is 25 kg complete with batteries.

To fasten the ROV in its storage position, the mount kit includes a quick release belt.

Specifications are subject to change without notice.
